What's a Guarantee?

Our idea of a guarantee is that the manufacturer who gives one—which hasn't any tags and loopholes—believes in his product. So much so that he stands ready to make good any loss suffered by the purchaser through defective material or workmanship.

It's mainly because of the guarantee that goes with them that we are selling and recommending Ames Holden "Auto-Shoes."

Of course, we know they give the cheapest mileage too—that they are dependable tires for any make of car, anywhere. But it's the guarantee that we talk about most. It's the straight and clearest, without time or mileage limits. It shifts our responsibility on to the manufacturer and he lives up to every letter of it. Come in and let us tell you about the guarantee that goes with

Stewart Govt. Supporters Nominate J. C. Cottrell

Only One Man Before the Convention. Choice was Unanimous

At an enthusiastic meeting representing all classes throughout the constituency of Acadia at Cereal on Friday evening, J. C. Cottrell, of Cereal, received the nomination from the supporters of the Stewart Government. The choice of J. C. Cottrell was unanimous, and among those present were farmers, business men, professional men and men from all classes.

Although the meeting was somewhat delayed on account of the late arrival of the delegates from the east, business was proceeded with promptly, after the chairman, M. J. Hewitt of Chinook, finished his opening remarks Mr. Cottrell was nominated by Mr. Archie McQuarrie, of Oyen, seconded by M. A. Aitkens, of Chinook.

In a short address, Mr. Cottrell expressed himself as feeling greatly honored by the action of the convention. In referring to the Stewart Government, he said that, if elected as their representative he would endeavor to conscientiously serve the of his riding and support a government which he thought was doing the greatest good for all classes.

The Platform

That the candidate accept as an Independent the platform of the Stewart Government.

That he also accept the Referendum and Recall. The recall to be in the hands of a committee appointed by the executive committee of the association, and to include the various group classes.

Mr. J. C. Cottrell will speak in Chinook next Saturday evening, July 16.

M. W. Bro. J. Watson, Young, G.M., and M. W. Bro. S. Y. Taylor, G.R.S., assisted by R. W. Bros. Cowan, Watt, Odell and others performed the ceremony of Constituting and Consecrating the Crocus Masonic Lodge in Chinook on Thursday, June 30. After the ceremony a banquet was held in the dining room of the Acadia Hotel.

England is passing not only through the hottest weather experienced in years, but also through a drought which has lasted almost two months. Crops are being damaged and the water supply is down to its lowest ebb.

The members of the Ladies Aid and other officials of the church met on Wednesday evening to welcome Rev. and Mrs. Kettys, who have come to make their home in Chinook. Mrs. A. George, president of the Aid, Mr. McLaughlin and Mr. Woodruff gave addresses of welcome to which Mr. and Mrs. Kettys replied. Supper was served during the evening.

Personalities

Remember the Fair, Aug. 4-5. No entry fee.

Mr. T. Radford and daughter left Tuesday for New Westminster, where they will spend a vacation.

Now's the time to paint that car. We have Effecto Auto paint Top Dressing and Body Polish See us for prices.—The Service Garage, Chinook.

A joint meeting of the Tuxis Boys and Trail Rangers is called for Friday, July 15, at 7.30 p.m. to discuss business of immediate importance.—G. A. Kettys, R. Smith.

Mr. and Mrs. D. McKenzie and family are spending a holiday visiting friends in Calgary and Nanton.

Miss Gladys Millichamp, of Sperling, Mann., is visiting her sister, Mrs. K. S. Woodruff.

On Sunday, July 17, Rev. G. A. Kettys will conduct Divine services as follows: Laughlin 11 a.m. Big Spring 3 p.m. Chinook Church 7.30. The people of the various communities are urged to come and worship with us.

Miss M. Smith, of Calgary, is spending her holidays visiting her parents, Mr. and Mrs. J. S. Smith.

Mr. Thomas Gilbertson, who has been visiting in Calgary, re-tuesday morning.

Mrs. S. P. Stata, of Akron, Ohio, is visiting her son, Mr. E. C. Stata.

A meeting of the Official Board of the Chinook Church will be held in the church on Wednesday July 20 at 8 p.m. All members are requested to be present.

Mr. V. O. Forrest is a visitor in Chinook this week.

Arrangements are being made for a fast and snappy baseball game for Fair Day, Aug. 5.

Mr. W. Carnill, Superintendent of the Government Labor Bureau Calgary, was in town yesterday, sizing up the labor situation in this district.

Mr. and Mrs. John Key, of Barrie, Ont., is visiting their son, Mr. J. N. Key.

Mr. M. H. Dobson, of Kerrobart, Sask., is visiting his brother, Mr. R. Dobson.

Get your entries in early for the Chinook Fair.—Mail them or get the Secretary to enter them up for you on Monday, Aug. 18

"The Store that Saves You Money"

Waste and Its Effect On Prices

One of the most important problems confronting the people in nearly all countries is how to bring down the costs of production to figures more nearly approximating those which prevailed prior to the war. It is likewise the most difficult problem to solve without creating conditions which would be even more disastrous than the present handicap imposed upon all productive enterprise.

The war created conditions which resulted in a rapid and phenomenal rise in the cost of all raw materials and labor; in fact, of everything entering into the production of goods and articles of every description. The inevitable result was an enormous increase in prices, and while war's demands kept up production to top-notch capacity, with the ending of the war and the re-stocking of the world's supply of necessities, there has come a falling off in demand and consequently in production because people cannot pay the prices which present costs of production make it imperative to charge. The result is unemployment, and the greater the number of unemployed the lower falls the purchasing power of the country. There must, therefore, be a decrease in the costs of production before there can be any marked improvement in the volume of business and of employment.

It is clear, therefore, that there must be a further readjustment. Prices of raw materials have fallen, but the cost of labor necessary to convert these materials for use continues so high, and the cost of transporting both raw materials and the finished products so excessive, that there is not the active evidence which the economic needs of the country and all people demand. And labor very naturally insists that it cannot work for a materially reduced wage until there is a reduction in costs of living.

There is one field, however, in which labor can do much to remedy the present situation and reduce costs of production without being obliged to accept lower wages, and the action which labor should take in the interests of all will not operate to further decrease employment but, on the contrary, the effect must be to increase employment. The action which labor should take is to remove the many restrictions which are arbitrarily imposed by their union regulations and which operate to increase costs of production out of all proportion to the actual work involved in production.

Reference was recently made in this column to the waste of time, labor and money involved in the insistence by printers that type set up for one purpose, say an advertisement in a newspaper, must not be used for another purpose, say, for example, in a piece of job printing, but that the same matter must be set up twice. This is pure waste, but the printers insist upon it under the mistaken idea that they are thereby creating more employment. As a matter of fact by unnecessarily increasing costs they are actually curtailing employment.

One of the most serious handicaps to business today is the excessively high railway freight rates. The unduly high charges are affecting every line of business and production. These high rates were partly brought about during the war by the high cost of raw materials, but these costs are now substantially lower. Wages, however, are still high. But the most serious item in costs of railway operation are the new regulations imposed by the railway unions which force the employment of three, four and five men to do a piece of work which one man, or a man and a helper, can do just as well and even more expeditiously. The labor of the others is pure waste, and for which the public is compelled to pay, and which necessitates excessive freight and passenger rates in order to pay for this waste.

Toll is taken on every bushel of grain raised, every head of livestock shipped, every load of lumber or coal, every item of merchandise handled, to pay for this waste. Nobody escapes from paying for a share of this waste. The railway employee who fancies he is profiting from enforcing these economically unsound regulations pays just as do other railway employees, union labor everywhere, and the people generally who know they do not benefit in any degree from having men employed in the doing of unnecessary and totally unproductive work.

Dean Swift, in one of his famous satires makes the King of Brobdingnag express the opinion that whoever could make two cars of corn, or two blades of grass to grow upon a spot of ground where only one grew before, deserved better of mankind and did more essential service to his country than the whole race of politicians put together. Unfortunately for the present age, organized labor seems to have become permeated with the idea that the wise, proper and statesmanlike course is for a man to produce only one-half or one-third as much as he is easily capable of producing, and to insist that several men should be employed to do what would be only a reasonable day's work for one.

In next week's article some recent disclosures resulting from an official inquiry will be cited as indicating the direction in which reform must come in order to right, or at all events improve, existing economic conditions in this and other countries.

New Use For Seaplanes

Fish Eggs Carried From Hatcheries To Inaccessible Points.

A new use for the seaplane has been found on the Pacific coast by officials of the department of marine and fisheries working in co-operation with the air board officials at the Vancouver seaplane station. It is in carrying fish eggs from the hatcheries to otherwise inaccessible parts of the coast line, where eggs can be placed under water in special boxes invented by one of the fishery officers and allowed to complete hatching there. Patrols are also being undertaken, in connection with the fisheries department officials to circumvent fish poachers who stray into forbidden waters.

Dining saloons on the Argentine railways are being furnished with pianos.

RHEUMATISM

Is Your's Acute or Chronic?

In either case you'll get such results from good old "Nervine" as has five times the pain destroying power of ordinary remedies. Nervine gives results because it penetrates to the source of the pain because it contains ingredients that destroy rheumatic pains. It is the unusually bad case that proves the power of Nervine. Suited for young and old; used internally and externally for many purposes, 50c at all dealers.

In India an elephant that has twenty toes is considered more valuable than the sacred white elephant in Siam.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Electric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Electric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Byng's Appointment Pleases Veterans The officers and representatives of the Dominion Command Great War Veterans' Association of Canada, assembled in conference at Port Arthur, unanimously recorded their pride and appreciation of the appointment of Lord Byng of Vimy as Governor-General of Canada and expressed a wish that he will honor the Great War Veterans by accepting honorary membership in the organization.

A Common Weakness. More men would make money if not so many had the habit of thinking that making it means getting it by other means than earning it.—Albany Journal.

RED HOT JULY DAYS

HARD ON THE BABY

July—the month of oppressive heat; red hot days and sweating nights; is extremely hard on little ones. Diarrhoea, dysentery, colic and cholera infantum carry off thousands of precious little lives every summer. The mother must be constantly on her guard to prevent these troubles or if they come on suddenly to fight them. No other medicine is of such aid to mothers during the hot summer as is Baby's Own Tablets. They regulate the bowels and stomach, and an occasional dose given to the well child will prevent summer complaint, or if the trouble does come on suddenly will banish it. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

An Inland Sea Voyage

Ideal Vacation Trip By Lake To and From Eastern Canada.

An unfilling cure for every ill that is not positively incurable, is Eastern Canada, two days and two nights on the water, in the fresh-fest of fresh air in the world, to the accompaniment of the finest social, or secluded environment known to human experience, is what the Canadian Pacific Great Lakes steamship service offers throughout the summer months.

The price is but a mere song. The bill of fare is without parallel in any holiday programme. The congeniality of the thing eclipses anything you have yet known. The succession of wonderful sights, landscape glories, engineering marvels, historic landmarks met with on the way during every making hour, absolutely beggars description.

Here's a heaven-sent opportunity for every soul seeking rest and restoration of body and mind, from the hard toiling business or professional citizen who has "run a little below par" to the saddest memorial of human frailty, hidebound to all advice from those who are compelled to live with him. A post card to any Canadian Pacific Agent will bring you every detail of this wonderful vacation tour of rejuvenation. R3

Minard's Liniment Relieves Neuralgia

"Your Teeth"

By Rea Proctor McGee, M.D., D.D.S., Editor of Oral Hygiene.

CONCERNING WOMEN

Copyright, 1921, by Rea Proctor McGee.

How beautiful would the most beautiful woman be if her teeth were all decayed and a few out here and there?

Wouldn't that "queen" her chances in the beauty show? In addition, how long would she keep her beautiful complexion? And if her complexion was gone how could she get by with a "drug store" complexion if her cheeks were all sunken in? And then where would her happy disposition be—and her digestion? All gone—and when these things are gone for a woman, old age is here, regardless of the number of years she has lived.

American women retain their beauty and their vivacity longer than any other women in the world, actually retain their youth more years than the women of any nation or of any time in history, all because the American dentist and American dentistry have preserved her teeth and her mouth.

Women's teeth are more subject to decay than men's. Nearly three-fourths of the twelve million people who go to the dentist regularly in the United States every year are girls and women.

The cheeks and lips get their support from the teeth and gums. Irregular teeth in children, particularly little girls should be corrected early not only for the proper occlusion, or biting, of the teeth, but because the contour and expression of the face from the cheek bones down depend upon the teeth. Would you rather have a smile from a row of stumps surrounded by ugly, red, swollen, spongy, inflamed gums or will you take yours from a lovely row of human pearls, regular and beautiful in shape, supporting the most gracefully curved lips, and surrounded by gums that radiate health and whose delicate pink is more perfect than the petal of a rose?

Health gives more beauty than contour. Many an otherwise unattractive face is brought high above the average by a clean, healthy, well-kept mouth.

A Dangerous Place.

An Irishman visiting a friend in hospital began to take an interest in the other patients.

"What are you in here for?" he asked one.

"I've got tonsillitis, and I've got to have my tonsils removed," was the answer.

"And you?" he asked another.

"I've got blood-poisoning in the arm, and they're going to cut it off," was the reply.

"Holy Moses," said Pat in horror.

"This is no place for me. I've got a cold in me head!"

The Prince's Hat.

King Edward set many fashions in England and Europe and the Prince of Wales seems to be following in his footsteps, in that respect. Reports from the centres of the English hating industry indicate the possibility of an early revival of trade. This change is credited to the Prince of Wales, who, in his Australian tour, wore a new style of hat which suited him to perfection. It was a soft smooth felt of light gray shade, with a black band.

It Will Relieve A Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will stop the cough because it allays all irritation in the throat. Try it and prove it.

What Did He Mean?

"I'm glad you're home early, dear," said the young bride. "I've made some lovely biscuits for dinner." "Good!" exclaimed Hubby. "Oh, that reminds me, I took out a \$10,000 life insurance policy today."—New York Sun.

Minard's Liniment for sale everywhere.

39 Herons Nest In One Tree.

There is a tree in Stanley Park, Vancouver, where thirty-nine herons' nests were counted. The baby birds were learning to fly and the tree looks like an animated garden of blue flowers.

The public libraries of Great Britain circulate nearly 60,000,000 books a year.

Every dollar spent in your home town is a boost for the community.

W. N. U. 1376

Edmonton Woman Now Eats Better and Feels Better Than In Years

"It certainly is wonderful how quickly the right medicine will get a person feeling well again," said Mrs. Edward Fuller, 12436 122nd St., Edmonton, Alberta.

"When I began taking Tanlac I was so weak and run-down I could hardly hold out through the day. Nothing I ate tasted good to me and I just had to force myself to eat enough to keep alive. I had a headache every day and was restless and nervous and slept so poorly that I

was worn out and listless when morning came.

"Inside of a month, Tanlac had me feeling like an entirely different person and I am now eating, sleeping and feeling better than I have in years. My headaches and nervousness soon disappeared and my housework which had been a drudgery before, actually became a pleasure.

"In my opinion there never was a medicine made that is the equal of Tanlac."

Tanlac is sold by leading druggists everywhere.

Brick Making Old Art

Romans Used Them in England in Year 44 A.D.

The Bible tells us of the manufacture and use of bricks. The most ancient records contain references to this building material, and we know as early as the year 44 A.D. the Romans used them in England. The actual scientific and mass production of bricks did not begin until 1886, when Alfred the Great directed that bricks be manufactured under government supervision. History does not tell of another ruler who became deeply interested in this industry until we came to Charles I. who, in 1623, thought it necessary to regulate the size of bricks, so that transportation difficulties could be overcome. An inventor in the United States by the name of Spence is credited with the first brick-making machine, but an Englishman, whose patent was granted in 1861, was the first to produce bricks by steam at the rate of 1,500 an hour.

It's advisable for a young man to make haste slowly if the girl has another string to her bow.

Animals and Music

Wolves and Elephants in Zoo Slept Through Performance.

A violinist recently gave a free performance to the inhabitants of the London Zoological Gardens, and the effect of his playing upon some of his audience was rather curious to observe, according to a correspondent. The serpents, lizards and scorpions seemed to be most appreciative of them all; some of them became quite agitated, while others hurried in the direction where the sounds proceeded and listened attentively. The bears, sheep, boars, lions and cobras all evinced keen interest in the performance. But the wolves, foxes and elephants slept the sleep of the bored. The monkeys were divided in their regard; some of them craned their necks with curiosity and listened with their hands behind their ears, while others chattered menacingly, or critically belittled themselves away.

It is easier for a father to keep his coin and his boy apart than it is to teach them to stick together.

CLARK'S

Pork and Beans

A Supply of "Clark's" Good Things, all ready to serve provides a choice of many excellent dishes for every occasion, without hours of cooking. For a satisfying, strengthening meal, serve

Clark's Pork & Beans

WITH CHILI, TOMATO OR PLAIN SAUCE

A real treat. Every bean cooked just right in the great Clark oven.

Never hard, never mushy, and the seasoning is delicious.

At Dealers Everywhere

You Can Prevent 40 %

Annual Depreciation in Your Car, Truck or Tractor

by using a lubricant that will stop friction which is the great foe for car life. Go into any repair shop and see the number of cars being overhauled because some owners think that all lubricants are equally good. Repair men will tell you that half of their business results from imperfect lubrication.

Whitmore's Gear Compositions

are not affected by changes of temperature. They are actively fluid in the coldest weather, and in extreme heat and at high speeds they constantly preserve an indestructible film on the bearings, preventing contact of metal to metal.

WHITMORE'S do not evaporate under extreme heat, the level is not reduced. Run it through a strainer and put it back in your car, truck or tractor. You can use it over and over again. One installation will last eighteen—twenty-four months where there is no leakage. Considered on a mileage basis no lubricant is so economical as Whitmore's. OTHER LUBRICANTS MAY COST LESS PER POUND—THEY COST MORE PER MILE. Don't ask for a grease—ask for Whitmore's Auto Gear Protective Composition, manufactured by The Whitmore Manufacturing Co., Cleveland, Ohio.

Freedom Of Trade Returning To Russia Through British Influence

London.—At the annual meeting of the Russo-Asiatic Consolidated Company, considerable light was thrown upon the recent political and industrial developments in Russia.

Leslie Uquhart, chairman, declared it was no secret that the British trade agreement with the Soviet Government had a profoundly moderating influence on the Soviet policy, and had been the compelling force at the Communist congress in March, which induced the Soviet Government to issue a decree re-establishing the freedom of trade.

Since the date of the decree, many small industries have been denationalized and returned to their owners, who are allowed to trade freely with their products. Foreign corn requisition has given place to corn taxation. The law now permits open barter between peasants and town workers, and admits the principle of private gain.

Many extremists have been dismissed from the Soviet Government, to make room for moderate men, and others have in practice renounced their communistic ideas. Gradual elimination of economic restraints mark the beginning of the re-establishment of favorable conditions for capitalistic development in Russia.

British Fleet Prepared For Turks

Mediterranean Squadrons Quit Malta When Situation Threatens at Turkish Capital.

Malta.—Virtually the entire British Mediterranean fleet with all the attendant ships, including the aircraft vessel Pegasus, is enroute for or concentrated within easy reach of Constantinople, where the situation is viewed with some alarm, in view of expected attacks by Kemal troops. It is said that British military reinforcements also are coming out from England immediately.

Never before has the harbor of Malta been so empty. Even the reserve ships here are destined for the east, and the vessels which recently sailed in that direction have carried large supplies of ammunition.

In view of these movements the commander-in-chief of the Mediterranean, Admiral de Robeck, who was expected here July 21, was not considered likely to come.

The only exceptions to the naval movement eastward are the vessels of the light cruiser squadron under Admiral Tyrwhitt, which are at Alexandria.

Favors Research Bodies.
London.—The Empire Universities conference at Oxford discussed technological education. Sir Arthur Currie, principal of McGill University, joined in the debate, advocating technological research in separate research institutes in close connection with a university.

Entertain Kiddies at Calgary.
Calgary.—The Calgary Elks entertained three thousand children at a monster picnic here, which proved to be one of the most successful affairs of the kind ever staged in Calgary. The day was a riot for children and grown-ups alike.

Gen. Smuts Is Hopeful For Peace In Ireland

After a Conference With De Valera Thinks That Problem Is Capable of Solution.

London.—For the moment General Jan Christian Smuts, the South African premier, is the outstanding figure in the hoped-for peace settlement in Ireland. General Smuts has returned from that country where he engaged in conference with Eamon de Valera and other men of influence in the Irish situation and he declares his belief that the problem is capable of solution.

In his remarks at a dinner of the South African colony, Gen. Smuts, pleading for conciliation on the part of both sides, declared that a similar problem, equally difficult, had been solved in South Africa and that now South Africa was one of the happiest countries in the empire.

The Irish problem, said General Smuts, was one largely engaging the whole empire. It was a problem, however, on which he could not speak now, except to express the belief that it was solvable and that "if we all

Morocco Troops Mutiny

Spanish Battery Driven From Position and Six Officers Killed.

Madrid.—Large contingents of natives have attacked and occupied a position in Morocco which was defended by a Spanish battery and two companies of natives who had been enrolled for service under the Spanish flag. The native companies advanced and killed six officers belonging to the force occupying the position. The native contingents afterwards attacked another position, but were repelled after a sanguinary fight lasting 26 hours, during which they suffered heavy losses, including 100 killed, while the Spanish troops had three officers, including a major, and 30 men wounded.

These events, which have been made known officially, have produced a bad impression, because the public had come to believe that there could be no more serious fighting in Morocco.

Irish Earl Still Missing

Police Believe Place of Detention Is Changed Daily.

Belfast.—Although numbers of the police and military are scouring the country in search of the Earl of Bandon, who was kidnapped at Bantry, County Cork, June 21, when his residence, Castle Bernard, was burned, no trace has so far been found of him. It is believed here that the place of his detention is changed daily, and that he is being held as a hostage for the safety of some condemned republicans.

A Farmer's Book

Drury, Morrison and Other U. F. O. Leaders Will Collaborate.

Toronto.—One of the Christmas books this year will be an autobiography of the United Farmers of Ontario. Premier Drury is writing of the movement as a whole; J. J. Morrison has been assigned to write the political aspects. W. L. Smith will outline the early Agrarian movement; Col. J. S. Fraser will tell of farmers' experience in running a newspaper; W. C. Good will reveal the economic reasons for the U. F. O.; and Mrs. George Brodie will write of what the United Farm Women of Ontario have accomplished, and hope to do yet. M. H. Staples, the U. F. O. director of education, will edit the volume and prophesy what will happen to the movement in the future.

Asiatic Cholera Ravages Russia.
Stockholm.—Asiatic cholera is spreading rapidly in the whole of European Russia, according to the public health records. There were 6,000 cases reported up to June 25. 'According to the Rosta News Agency in Moscow all the Imperial castles and country houses of the nobility in the Crimea will be converted into hospitals.

Degree From Edinburgh University.
London.—Premier Meighen has accepted the offer of Edinburgh University to confer upon him the degree of doctor of laws and he will visit that city on July 18. He will also receive the freedom of the city.

Reel Thrill at Calgary Fair.
Calgary.—Eight thousand people, the largest grandstand crowd of the present Calgary exhibition, were given a real thrill during the automobile races when a Mooney special, driven by Ureke Larson, threw a wheel when travelling close to 60 miles an hour.

The car plunged through the dirt for 30 feet, while Larson turned at a few moments but fortunately escaped unhurt.

Russia Wants Autos.
Paris.—Representatives of Soviet Russia have been feeling out the ground in trade circles in France with the view, they indicated, of placing orders for automobiles and other articles of commerce, but reports from commercial quarters are that they have met with little encouragement.

Census Returns Rapid.
Ottawa.—Returns from the census commissioners are coming in rapidly to the Dominion Bureau of Statistics according to a statement made by E. S. McPhail, assistant census commissioner. The census so far promises to be the most complete in the history of Canada.

Gardiner's Big Majority.
Medicine Hat.—Official count of the Medicine Hat by-election held on June 27, gives Robert Gardiner, National Progressive candidate, a majority of 9,749 over Col. Nelson Spencer, Government candidate, with still one poll to be heard from.

Amundsen Will Sail For North Pole

New York.—Captain Amundsen is going to try and drift across to the North Pole. Arriving here after his rescue from the Siberian coast, the Norwegian explorer was quick to say that he would repair his damaged ship Maude, and go north again next summer to freeze into the polar flow and start his Arctic drift, which he expects will take five years.

Economic Loss To Britain

Seventy Million Days Were Lost Over the Coal Strike.

London.—Seventy million working days lost to the nation and £18,000,000 of extra expenditure incurred by the Government, are the official estimates computed in connection with the economic situation caused by the coal dispute.

The defense force army of reservists claim £70,000,000 and the railways claim £9,000,000 against the State for May alone.

The emphasis of the State coffers is demonstrated by the surprise announcement in the House of Commons that a new and unlimited issue of treasury bonds at 97 and bearing interest at 5½ per cent. is urgently needed to meet obligations maturing in the next few months.

Three hundred million pounds of debts has to be dealt with instead of the one hundred million originally budgeted for. The new bonds will run for eight years, their giving time for a significant fund operation at a more reasonable opportunity.

Farmer Leaders' Tour

Waiting to Learn What Dates Can Be Arranged With Hon. T. A. Cregar.

Toronto.—The tour of the Big Three farmer leaders is still up in the air. Premier Drury and J. J. Morrison have been waiting to learn what dates could be arranged with Hon. T. A. Cregar.

Today word was received at U.F.O. headquarters to the effect that Mr. Cregar could not promise any definite time as yet, but that he still was making efforts to attend the Canadian Council of Agriculture, which opens its session in Toronto on July 26. If he is able to do so, the speaking tour will probably be made late in July or early in August.

Reclaim Land in B.C.

Work Will Be Carried On By British Columbia and Idaho Governments.

Victoria.—Reclamation of 100,000 acres of agricultural land in the Kootenai Plains, one-third of which is in British Columbia and the balance in Idaho, was discussed at a conference here between Premier Oliver, John T. Pattullo, minister of lands, and Governor Baker, of Idaho, and W. C. Swenson, of the Idaho reclamation commission.

It is expected the reclamation work will be carried on jointly by the British Columbia and Idaho Governments, but Ottawa and Washington will have to be consulted.

Reel Thrill at Calgary Fair.
Calgary.—Eight thousand people, the largest grandstand crowd of the present Calgary exhibition, were given a real thrill during the automobile races when a Mooney special, driven by Ureke Larson, threw a wheel when travelling close to 60 miles an hour.

The car plunged through the dirt for 30 feet, while Larson turned at a few moments but fortunately escaped unhurt.

Russia Wants Autos.
Paris.—Representatives of Soviet Russia have been feeling out the ground in trade circles in France with the view, they indicated, of placing orders for automobiles and other articles of commerce, but reports from commercial quarters are that they have met with little encouragement.

Census Returns Rapid.
Ottawa.—Returns from the census commissioners are coming in rapidly to the Dominion Bureau of Statistics according to a statement made by E. S. McPhail, assistant census commissioner. The census so far promises to be the most complete in the history of Canada.

Gardiner's Big Majority.
Medicine Hat.—Official count of the Medicine Hat by-election held on June 27, gives Robert Gardiner, National Progressive candidate, a majority of 9,749 over Col. Nelson Spencer, Government candidate, with still one poll to be heard from.

Sylvia Pankhurst Freed

Sylvia Pankhurst, recently released from Holloway Jail, London, after serving five months as a result of articles that appeared in her Communist paper, "Workers' Dreadnought."

Airships For Forest

Two "Blimps" Will Be Used in the Lake of the Woods District. Camp Borden, Ont.—Two airships of the blimp type were shipped recently to be used by the Keweenaw Lumber Company in the Lake of the Woods district. Under the direction of Lieut. Col. Mallock, D.S.O., formerly of the naval air service, they will be used for forest patrol work, as well as aerial photography. They are being loaned by the air board so that reports on their capabilities may be made by the company.

Canada To Share

In Reparations Basis Likely to be on Expenditure of Country and Number of Casualties.

London.—The conference of Prime Ministers are grappling with the problem of reparations. Under the decision reached by the Supreme Allied Council, the Empire receives twenty-two per cent. of whatever Germany pays, fifty-five per cent. going to France and the balance to Belgium and Italy and the other allied nations. The task now confronting the conference is to fix a basis upon which the amount to be collected by the Empire shall be apportioned among its different parts.

It is being found, involves no little difficulty. It involved difficulty because a basis that might work advantageously for one dominion might prove unfair to another. Thus, for example, if loss of shipping were to be made the basis, the mother country, which suffered so heavily in tonnage, would get practically everything and the dominions nothing.

No decision was reached, but it is understood that it is not improbable that the amounts will be determined by expenditure and the number of casualties. This is believed, would be satisfactory to Premier Meighen in view of Canada's comparatively heavy sacrifices, both in blood and treasure, it would ensure the Dominion receiving a fair share of whatever amounts are paid over.

As to what amount it may be found possible to collect from Germany, that, of course, is an entirely different matter. Sir Robert Horne, chairman of the exchequer, who addressed the conference on the matter, remarked that his words were held confidential, but there is good reason for stating that he was not over sanguine of any great sum being realized.

Signs of Conciliation

London.—Sixteen flags interwoven with Union Jacks in the Irish quarter of Liverpool greeted the visit of the Prince of Wales to that city, and, according to a prominent Sinn Féiner, the order for this came from Dublin. Other signs of conciliation are looked for as a general cessation of hostilities is considered essential beyond all else to negotiations for peace.

Flax Factory For West

Winnipeg.—Winnipeg is likely to be selected as a site of a \$3,000,000 factory for the spinning and twisting of flax, according to R. J. Hutchinson, chief of the fibre division of the Federal Department of Agriculture, who was here enroute to Ottawa after visiting the principal flax-growing centres in the west. Choice of location is between Calgary and Winnipeg, Mr. Hutchinson said. The erection of the factory will be begun early this fall.

My First Dog Driving

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

(Continued)

I also speedily adopted the native dress which is infinitely the best for the north. A dark blue 3½ lb. blanket capot, unlined, which came about halfway to the knee, and strange to say they were made without buttons but fastened with buckskin thongs and gartering. Then strong leggings coming halfway up the thigh, made loosely and always with a fringe on the outside seam, white for every day and blue for festive occasions. These were always gartered firmly below the knee. Then best of all, a full-sized lasso assumption belt of many colors which was girded about the hips and formed a great support and also made the costume much warmer. A huge pair of fur or moose skin mittens were always carried as a spare. These were fastened together by a long loop enough to go over the belt. Gloves or light-gaits were used when running, but if caught in a storm or lost track the big ones were essential.

The first experience a tender foot has when running is to sweat violently, and here the ordinary wool sock is but of little use as it gets wet where you tread and is difficult and slow to dry. So I soon discarded them and adopted the oblong duff or strand square, which can be dried in a minute or two at any stop and there are four changes, one in each corner of it. I still kept the legs of the wool stockings and simply cut the feet off.

There is another most important part of a dog driver's equipment, and that is the whip. The ordinary husky is as cute as a fox and quite often as wicked as a bear, so his respect for his driver is governed by the latter's ability to punish. A good whip is made of plaited deer skin things over a round heart, which is loaded with shot tapering in size. Four, six or eight thongs are used according to taste. First-class whip makers were famous and found a ready sale for their whips practically at their own prices. The handle was of hardwood, sixteen to twenty inches long, and loaded at the head. This was useful as a weapon if the dogs attacked you. Well, I have described the whip to the best of my ability, but how to use it is quite another matter. What hours I spent in practicing, and after some years did attain a certain measure of success, but was never a crack by any means.

It was in a fearsome sight to see Johnny Beads when thoroughly exasperated by the conduct of his team, applying the whip. Upsetting his eyesight placed his foot on the trace he would proceed to flail the culprit whose yells could be heard for miles, while his mates would jump in for sympathy. At every stroke the hair would fly from the shoulders to the hips. The Russian Knout could

not have been much worse. The whip, however, was not brutal, but a chub was, and I have often interfered when the latter was used. For my own team were so willing and high-spirited that a whip was not necessary. Sired by a Scotch stag hound, their mother a husky, they all took after the father in disposition, and were the only first-class team I was ever lucky enough to own. The whip, however, was always necessary at feeding time to protect your own team. Two whitfish was the dog's meal for each dog and this was his breakfast, dinner and supper all in one, for as a rule dogs were never fed in the daytime; though with my fast travellers, especially when alone, I found a small quantity of dried or powdered meat very helpful in the middle of the day. These fish were carried frozen and were thawed off night before the camp fire. They are stuck through the tails by a stick called the speed, which was useful to carry them by. Feeding time arrives and the dogs consisting of two, three or four teams, have been watching the fish at the fire closely. You call your own dogs, all the men being a little distance apart. My dogs were delicate and did not bolt the fish in two bites as Brandy would. Accordingly an attack would be made on my team by the other dogs every night, and at first I would yell for assistance, much to the amusement of the other drivers.

And so the days went on. That afternoon was visited by the factor until we were homeward bound for Fort Ellis, making the last camp at Riding Mountain House with some sixty miles to go. The iron factor still kept me ahead and descending a hill, a branch caught my snow goggles and whirled them into space. No one could find them, so on we went, and consequently I was laid up for a day or two with a severe attack of snow blindness which is most painful. The native cure is to steam the eyes over strong black tea and polish them with the leaves.

Spraying of pains in one place which are dreaded by dog drivers. I was camping later on that winter with Johnny Beads at the Qu'Appelle River on route to Fort Ryley, and after we had made our camp he took his blanket and axe and started for the ice. I watched him with interest as he steadily chopped for half an hour and at last struck the water which, as usual, rose to the top. He then stripped off his moose skin pants and moccasins and held his leg in the ice water right up to his middle for over six minutes. Then, wrapping his blanket round him, he came tearing up through the snow barefooted to camp. "What have you been doing Johnny?" I asked. "Oh," he replied, "I had a pain in my leg and that is the best cure."

Britain Is Grateful

Express Appreciation of Services Given by Governor-General To Canada.

Ottawa.—A cablegram of appreciation of his services while governor-general of Canada has been received by His Excellency, the Duke of Devonshire, from the secretary of state for the colonies. The cablegram is as follows:

"His Majesty's Government have observed with great pleasure the terms of high appreciation in your services as governor-general of Canada are acknowledged in the address presented to you at the closing of parliament and in the speeches on the address made in both houses. They are much gratified to note the recognition in all quarters of your devotion to Canada and Canadian interests during your term of office and feel that you have thereby rendered notable service to the whole Empire. I should be glad if you will communicate this telegram to your government."

Bush Fires In Ontario.

Toronto.—Although bush fires are blazing in dozens of places in Northern Ontario on both sides of the Temiskaming and Northern Ontario Railway east and west of Cochrane, no great conflagration has developed as yet, due to the fact that there has been no wind to speak of. Reports from the north agree that if a stiff wind springs up before rain comes to extinguish the flames, no section of the settled part of the north country will be free from the menace of fire out of control.

Strength Of Empire

Tolerance Is Secret of British Success, Rabbi Hertz States.

Vancouver.—Speaking before the Canadian Club here, Very Rev. Joseph H. Hertz, chief rabbi of the United Hebrew Congregation of the British Empire, declared that the latitude and longitude of spirit in British institutions is the secret of Britain's imperial success. By latitude, Dr. Hertz explained, he meant the broad spirit of tolerance which has obtained throughout the empire in general and in Canada in particular; by longitude, the habit of taking an ascending view of things.

"The British Empire," declared Dr. Hertz, "is not built up on machine guns." The effect of the British system upon the races that make up the empire, he illustrated by the loyalty of the Jewish race, which sent 50,000 to fight for her in the late war.

Black Rust Menace

Damage to Crops Is Feared By Government Officials.

Winnipeg.—Reports that have been reaching here from different parts of Manitoba and Saskatchewan, that black rust had been detected on the growing wheat are now substantiated by Government officials, says a Winnipeg newspaper. The newspaper says that several samples received from a number of points in the west "have proved conclusively that the infection is widespread."

Damage to the crops depends on the weather during the next week or two, but the fact that black rust has made its appearance at this early date is considered serious, but not alarming, the paper continues.

CARE OF MUNICIPAL PROPERTY

In our towns and cities one can-
not go far without observing con-
ditions of neglect and carelessness
due entirely to the lack of
interest of the people themselves.

Unfortunately, the average citizen
feels that once he has paid his
taxes he has fulfilled his duty, and
the city can do the rest. He overlooks
the fact that the city is but an aggregation
of units, of which he is one; that any im-
provement or maintenance charges
must be paid for by these units, and he
must bear his share.

It is a well-known axiom that a
careless employer is reflected in
cost of municipal works is largely in
excess of the cost of such works
when privately carried out.

Many instances might be cited
of losses due to either wilful damage
or carelessness by the people
themselves. In an eastern city
during the past month a sewer
became blocked by the depositing
of material which could not be
carried away. Many cellars
were flooded and a cost of \$30,000
entailed. These losses are reflected
in the tax rate, and just so long
as so much of the public revenue
must be utilized to replace or repair
the effects of neglect or disregard of
public property, just so long will the
tax rate continue to increase.

The co-operative credit act of
1917 enables fifteen or more farmers
to organize into a mutual credit
society, the province through
legislation enacted at the last
session standing behind those
associations with a full guarantee
of the borrowings. These societies
are thus enabled to secure short
term loans from the banks at the
lowest possible rate of interest,
the government assisting in every
possible way with the organization
and the financing.

Govt. Crop Report

Edmonton, June 29th, 1921.

Crop conditions generally
throughout the province are in
fairly satisfactory condition. The
month of June has been rather
dry over most of the province.
Nearly every part has been visited
by local showers, but there has
been no steady rain to saturate
the ground. Conditions in
Grande Prairie and Peace River
districts are exceptionally good,
this territory having had more
rain than any other part of the
province. The Grande Prairie
correspondent reports that the
prospect for a crop is the best in
the history of the district at this
time of the year. The remainder
of the province is all in need of
rain at the present time. The
north central portion has had
sufficient scattered showers to keep
the crops growing and in certain
areas of this district there is
sufficient moisture to carry the crop
for some time. In the more
southerly districts moisture has
been very short for a period of
about two weeks except in a few
parts where local showers have
fallen. Over a considerable area
the dry weather has been of
sufficient duration to injure the crop.
However, if moisture were to
come within the next week there
is still a chance for a good crop
in most districts. On account of
the cool, dry spring hay will be
short. A considerable amount of
wheat is already shot. This is an
early record for grain being in
head, particularly for the northern
sections.

Grasshoppers and Cutworms
Grasshoppers have hatched in
large numbers throughout the
south and central portions of the
province and some have been re-
ported as far north as High

Why Should the United Farmers of Alberta Oppose The STEWART GOVERNMENT?

Premier Stewart is one of the best farmers in the province.

The Provincial government has enacted more legislation in the interests of the farmers than any other government in Canada.

The platform of the U.F.A. is almost identically the platform of the Stewart government.

All classes and sections have received the utmost consideration at all times from Premier Stewart and his cabinet.

The government has been progressive and business-like.

Critical times are ahead, and the government is prepared to cope with these problems in an experienced and careful manner.

Why, Then, Should Premier Stewart Be Opposed?

Remember what Hon. T. A. Crerar, national leader of the organized farmers, had to say when he addressed the U.F.A. convention in Edmonton, January 20th, 1921, as reported in the press.

"Mr. Crerar pointed out that the business of government, he cared not whether it was a municipality, a province, or in the wider federal field, was a business that should engage the attention of every honest citizen, no matter what his calling or occupation might be, and consequently, that being the case, he for one was willing to take common ground with the other man, whatever his profession might be, so long as he believed in policies that he, the speaker, believed in, and who was willing to work with him for those ends."

"That does not mean that the position of your organization, or any farmers' organization, is challenged," said Mr. Crerar. "It would be a thousand pities if we were to do anything in Canada today that would destroy the integrity and effectiveness of the farmers' organization. Your U.F.A., as your president has pointed out on many occasions, must continue its existence and life as a farmers' organization, built up as such, but let me say this—when you get into the wider field where you are dealing with matters of vital importance to all the people of the country, do not refuse the support and assistance of the man who is willing to work with you toward that end. You will fail in your final purpose if your motive is to seek power alone for the sake of power. It would be a fatal mistake if we became animated with the desire to acquire power in government merely for the sake of having it."

Critical Times In The Era of Re-establishment Are Still Ahead—The Words
of Hon. Mr. CRERAR Carry a Note of Grave Warning—The
STEWART GOVT Has An Unchallenged Record Of Splendid
Public Service. Why Not Stand Together And
Work Together?

NOTICE TO CREDITORS AND CLAIMANTS

In the District Court of the District
of Acadia, Province of Alberta,
Canada

IN THE ESTATE OF JOHN LOUIS
LEPATOUREL, late of Chinook, in
the Province of Alberta, Farmer,
deceased.

NOTICE is hereby given that all
persons having claims against the
estate of JOHN LOUIS LEPATOUREL,
who died on 24th March, 1921, at Cay-
ley Alberta, are required to file with
the undersigned, Solicitor for the Ad-
ministrator Arthur J. Mes Lepatourel,
by the 2nd day of September, 1921, a
full statement, duly verified, of their
claims and of any securities held by
them; and that after that date, the
Administrator will distribute the as-
sets of the deceased among the per-
sons entitled thereto, having regard
only to the claims of which notice
has been so filed, or brought to the
notice of such Administrator.

Dated 8th July, A.D. 1921.
J. N. OLDHAM,
of Hanna, Alberta,
Solicitor for the Administrator.

M. L. CHAPMAN

Chinook, Alta.

GENERAL DRAYING
All orders promptly attended
to

Prairie. In all cases farmers are
energetically fighting the pest,
consequently there is no great
danger of serious damage being
done and there has been practically
no loss up to the present
time. Cutworms have been prevalent
over a limited area in the
south, but the period in which
they do damage is now past and
much of the crop destroyed has
been re-seeded to green feed.
Soil drifting has caused very lit-
tle damage and crops are suffi-
ciently far advanced now so that
no loss from this source is antici-
pated this year.

JAMES McCAIG,
Crop Statistician.

Figures Show How The Agricultural Wealth Of Canada Is Increasing

Agriculture ranks first and foremost among Canada's industries, and by means of its progressive strides successfully maintains its place at the head of the list in spite of the rapid progress made each year in manufacturing and other Canadian activities. The total estimated agricultural wealth of the Dominion in 1920, according to the Monthly Bulletin of Agricultural Statistics, amounted to \$7,621,511,000 exclusive of miscellaneous products such as tobacco, flax, fibre, and maple products which would add another \$23,000,000 to this total.

Agricultural production for the year 1920 is estimated at \$1,946,648,000, made up of field crops, \$1,455,244,000; farm animals, \$1,048,000; wool, \$5,221,000; dairy products, \$256,000,000; fruits and vegetables, \$40,000,000; and poultry and eggs, \$30,000,000. To arrive at the estimated agricultural wealth, \$4,323,588,000 is added for land and buildings, \$391,659,000 for farm implements, and \$1,641,245,000 for farm livestock.

The estimated agricultural wealth of the previous year, 1919, was \$7,379,299,000, showing an increase in value for the past year of \$232,832,000. An increase in production value accounts for part of this, significant of a remarkable increase in yield when the decline in prices of farm commodities is taken into consideration. The steady and continual rise of farm land with the improvements in the way of buildings thereon had the effect of nearly doubling this item of the estimate. Whilst the value of the country's possession of farming implements increased considerably there was a decline in the value of livestock, though no perceptible dwindling in numbers for the main part.

The ascending value of agricultural production in Canada is very clearly illustrated in a comparison of the values of the past six years. In 1915, the total production was valued at \$1,118,694,000; in 1916, at \$1,223,952,000; in 1917, at \$1,621,028,000; in 1918, at \$1,905,373,000; in 1919, at \$1,975,841,000; and in 1920, at \$1,946,648,000. Between the years 1915 and 1920, field crops increased in value from \$825,371,000 to \$1,455,244,000; farm animals from \$79,553,000 to \$1,048,000; wool from \$3,360,000 to \$5,221,000; dairy products from \$146,005,000 to \$256,000,000; fruits and vegetables from \$35,000,000 to \$40,000,000; and poultry and eggs from \$25,000,000 to \$30,000,000.

Many factors are contributing to the improvement of Canadian agricultural wealth. Each year sees a substantially increased acreage and production due to continuous settlement, which in its turn effects an elevation in Canadian farm land values.

Betterment of Livestock

Pure-Bred Bulls Distributed Among Farmers in Western Canada.
In the interest of the betterment of livestock, about four hundred pure-bred bulls are being distributed among farmers in Western Canada under a loan scheme of the Dominion Government. R. S. Hauser, chief of the livestock branch of the Dominion Department of Agriculture, has purchased three hundred purebred bulls at the various shows held in Western Canada for the purpose of acquiring additional first-class animals in connection with this scheme.

Increase In Canada's Exports

Trade in May Exceeds That of a Year Ago.
Canada's exports to the United Kingdom for the month of May have exceeded by \$3,000,000 those of May, 1920. The current weekly bulletin of the department of trade and commerce points out that while Canada is experiencing with other countries the excessive reaction in business still her export trade has not diminished in nearly the same proportion as her imports. Furthermore, in considering the declines from 1920 figures, the bulletin states that the value of the dollar is considerably higher in purchasing power today than this time last year so that the slump is not so ominous as it appears at first sight.

Incorporate Reindeer Ranch Co.
Another company, with the object of ranching the reindeer and selling the meat as well as utilizing the hides, has been incorporated at Vancouver, under the presidency of Stefansson, the Canadian explorer. He will leave with an expedition this fall to determine on the suitability of certain islands in the Arctic north of the Dominion.

Fair Sex as Farmers

Resolution Urging Government to Permit Women to File on Homesteads.

A resolution urging the Federal Government to permit women to file on homesteads on the same basis as men was passed at the convention of the Federated Women's Institute at Edmonton. At the present time only widows may file under the homestead regulations and it is pointed out that since the war women have discovered they are quite capable of performing all the work a farm entails. Several nurses who served overseas have exercised their soldiers' right to take homesteads whilst other women have purchased lands they are unable to secure otherwise.

British Factories

Advocates British Factories for Dominion to Hold Trade for United Kingdom.

The erection of British factories in the Dominion in order to secure for the United Kingdom a share in the "great industrial future of Canada," is advocated by Sir Peter Rylands, president of the Federation of British Industries, in a contribution to the Weekly Bulletin of the Department of Trade and Commerce. Sir Peter urges increased reciprocal trade between the United Kingdom and Canada, and the investment of British capital in the Dominion. He professes the services of the federation's officials in their various centres, on behalf of Canadian business men visiting the United Kingdom.

Fisheries Production

Salmon Is Canada's Most Important Fish, the Lobster Coming Second.

The fisheries production of Canada for the year 1920 reached a value of \$49,321,217, according to returns just issued by the Dominion Bureau of Statistics. British Columbia's fishing industry accounted for \$22,300,000 of the total, and that of Nova Scotia for \$12,700,000. Salmon is by far Canada's most important fish, the lobster coming second, and cod, halibut and herring in the order named. Nearly \$2,000,000 worth of whitefish were marketed.

Human Qualities of Sims

Nothing Petty or Small in His Open-Hearted Manner.

In his human qualities as in his naval exploits Admiral Sims is after the American people's own heart. When this grizzled, rugged, open sea warrior, who will be sung in fame and fable for his achievement in the great war of all history, was the object of an attempted humiliation upon him by a man of very little consequence in the big affairs of this big world, various and varied may have been the opinions as to how the renowned Admiral would take it. Admiral Sims might have blazed into indignation, or he might have challenged the justice of the official reprimand, or he might have withdrawn in the sulks. But Admiral Sims did none of these things when Denby offered him the petty affront. With his honest sailor speech and jolly sailor laugh that splendid tamer of the German submarines manfully blurted out to the public, "Having spilled the beans, I got what was coming to me." The more the American people see of Sims, their great naval figure of the war, the better he looks to them.—New York Herald.

Developing Grain

Benefits Derived From Improving Strains In Cereals.

What can be done in the west in respect of developing grains, trees, fruits and vegetables was illustrated forcibly by George H. Hutton, of the Canadian Pacific Railway's Department of Natural Resources, when addressing the Calgary Board of Trade for he stated that during last year alone Alberta had realized from \$20,000,000 to \$30,000,000 more from Marquis wheat due to the work of Dr. Saunders, of the Dominion experimental farms, who evolved this type from the Red Fife and the Calcutta Hard.

The Primrose Path.

Road maintenance is even a greater problem than road construction, the only road that remains smooth and inviting without maintenance is the broad road to perdition every mile of which may be coasted.—Louisville Courier-Journal.

Experimental Farms Prove To Be Great Benefit To The Farmer

Men and Conditions

Within the Power of Many to Control Conditions of Various Kinds.

"You may think goods are the foundation of business," said a successful merchant a short time ago. "But they are not; men are the foundation." This merchant, in an interview, persisted in talking of men rather than business "conditions." Men, to him, were the controlling factor in trade affairs at any time. The right kind of men could do much to control and shape conditions; other kinds of men were dominated by the conditions. The fact which this prominent man of business emphasized may be widely applied. The differences of conditions anywhere are largely the differences of men. One man makes misfortune, financial or otherwise, the opportunity for some kind of advancement; another apparently is unable to do anything but accept the conditions as they come and allow himself to be molded by them. Here is the difference that counts—the difference in men. It is within the power of many to control conditions of various kinds. Whether they will to exercise this power becomes the determining factor in their lives.—Kansas City Star.

Faculties of Journalism

Resolution Urging Governments to Add Journalism to Curriculum.

Recommending that faculties of journalism be established in provincial universities throughout Canada, the Canadian Weekly Newspaper Association adopted a resolution at its convention held in Vancouver recently urging that provincial governments take steps to add journalism to the curriculum of universities. The resolution expressed commendation of Manitoba and Ontario as the pioneer provinces in this respect.

It pays to patronize home industry. Buy from the merchants in your own town.

Agriculture is the first industry of the Dominion, and likely to remain so, and recognizing its importance as such, no pains nor efforts are spared in developing and promoting it by every means possible. The Government of Canada and many influential organizations unceasingly are exerting every effort to induce colonization and people the nearly one hundred million acres of fertile unoccupied arable land in the Prairie Provinces as well as the undeveloped lands of Eastern Canada and the Maritimes. But their zeal does not end with getting immigrant peoples settled on the land. It is the country's aim to make each a successful agriculturist both to his own profit and that of the Dominion, to this end, maintaining the supremacy of Canadian agriculture.

One of the principal and most successful means in accomplishing this is the experimental farm. Canada has established and developed an excellent system of experimental farms which cover the country and adequately serve, with their branches, every settled portion of the country. The central experimental farm, which is headquarters for the Dominion, is located at Ottawa, whilst branches and auxiliary farms and stations are to be found in every province. There is one farm in each of the provinces of Prince Edward Island, New Brunswick and Ontario, two in Nova Scotia, four in Quebec, two in Manitoba, three in Saskatchewan, two in Alberta, and four in British Columbia. There are also two sub-stations in Alberta, two in the Yukon, and one in British Columbia. An addition to the system is the tobacco stations at Farnham, Quebec, and Harrow, Ontario.

At all these farms, experimentation and research are carried out on every phase of agriculture, and advice and assistance rendered on every aspect of farm life. Their operations have proved of immeasurable benefit in ascertaining the adaptability of certain sections to specific crops, originating plant life proving the crop values of newly settled areas, and extending information on every point in farm life. They are at the continuous service of the Canadian farmer who is confronted with some problem in his daily round or who is in doubt as to how to proceed with some operation.

The results of experimentation, the reports of researches and concrete information for the farmer, is disseminated by the Exhibits and Publicity Branch. Exhibits are held all over Canada at provincial and local fairs, lectures are given on a wide variety of subjects, and an extensive distribution of literature is made.

The farmer in Canada is recognized as the most valuable asset the country possesses. He is at the basis of the nation's wealth and progress; he is the hinge upon which swings national development. To make better farmers and promote agriculture generally is recognized as a prime factor in Dominion expansion, and to effect this warrants the nation's utmost endeavors. Canada has already surpassed the world with both the quality and quantity of her agricultural products, and this in some little measure is due to the system of experimental farms at all times at the farmer's service.

Expect Big Apple Crop.

Everything points to a record apple crop in British Columbia this year, and, if nothing happens to hamper growth, the prairie markets are assured of a good supply of high grade apples, according to J. A. Grant, British Columbia Fruit Commissioner for Alberta. Mr. Grant estimates that five thousand cars of apples will be shipped out of British Columbia this year, which is an increase of nearly 100 per cent. over last year's output.

Voting In Ancient Pompeii.

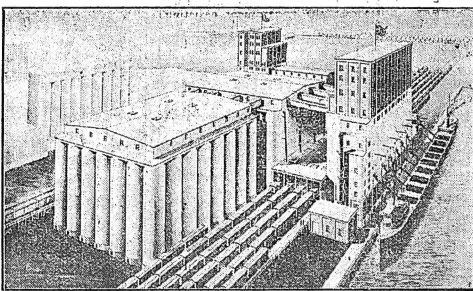

Ancient Pompeians had both primary and general elections, similar to those we have in every town and city each spring. They were in the midst of an exciting local election, it is indicated by remains discovered when Pompeii was destroyed in 79 A.D.

British Capital Interested In Oil.

Several prominent British financiers, interested in oil development, are expected in Calgary this summer, to investigate not only the northern oil fields but the producing area of Southern Alberta.

Women Lawyers In Alberta.

Another woman, Rose Rein, has successfully passed her final examinations in law and has been authorized by the Alberta Law Society to practise her profession in Alberta.

One of the Mammoth Elevators at the Head of the Great Lakes, from whence Western Canada Grain is Transported by Boat to Eastern Canada.

American Rancher in B. C.

Albert H. McCarthy, of New York, Has 5,000 Acres Near Wilmer.
Encouraged by the success he has attained in the Lake Windermere district since he first settled there some eight years ago, Albert H. McCarthy, of New York, has decided to go into the cattle raising industry and for this purpose has purchased some 5,000 acres of land near Wilmer. A force of carpenters and others are at work putting up the necessary buildings, which consist of "several" dwelling houses, large barns and feeding sheds, etc.

Fur Sealing On B.C. Coast.

West Coast Indians expect to take about two thousand fur seals this season. Last year the catch was twelve hundred. Indians are the only persons who can legally take these animals, outside the legal percentage permitted by International Treaty.

Prince Rupert Fisheries.

For the first two weeks of May, the halibut receipts for Prince Rupert totaled 1,600,000 pounds, exceeding for a like period anything in the history of the fishing industry. This is exclusive of 200,000 pounds which was forced to go to other points.

There are natives in Central Africa who can jump five feet into the air from a standing position without an effort.

The best type of man for long life is rather short and below the normal weight, it is said.

Saskatchewan Highways

Extensive Programme Is Mapped Out By Department for this Year.

Nearly a million dollars worth of work in the province is now under construction or is about to commence by the Saskatchewan Department of Highways or by municipalities under contract with the department. The programme includes the construction of 230 miles of provincial highways, a somewhat smaller mileage of main trunk roads, 16 steel and concrete bridges, 90 timber bridges, and 9 reservoirs.

Manitoba Rural Credits.

There are now seventy-five rural credit societies in Manitoba, seventeen new ones having been organized since the end of the fiscal year last November, according to C. Gifford, supervisor. Loans granted total \$1,640,000, which is about \$67,000 less than last season.

Growth of the U. F. A.

The United Farmers of Alberta, the premier agricultural society of the province, has of late years increased in its membership by leaps and bounds, now numbering with women and children more than 32,000.

Got a Backhander.

"What did Edith say when you asked her for her hand?"
"She simply said, 'You take the palm'."—Boston Transcript.

If there were no air, a lump of lead and a tiny feather when dropped from the hand together would reach the ground at precisely the same time.

Tractor Sales in the West

Estimated That There Are 33,000 Tractors Now In Use.

Last year 10,279 tractors were sold in Western Canada, distributed as follows: Manitoba, 3,671; Saskatchewan, 4,229; Alberta, 2,379. The number of tractors sold in the west during the past four years is as follows: 1917, 5,000; 1918, 7,000; 1919, 9,000; 1920, 10,279. It is estimated that there are 33,000 tractors now in use and sales for 1921 will probably reach the 7,500 mark.

Strawberries In Manitoba.

It is predicted by agricultural authorities that within ten years the province of Manitoba will be producing sufficient plant strawberries to entirely fill her preserving needs and the bulk of those required for immediate consumption.

Saskatchewan Sulphide for Ontario.

The drying plant which is being constructed at Fulkler, Sask., for the Soda Deposits, Limited, is now completed, and arrangements are being made to ship the product to the pulp mill at Dryden, Ontario.

The patriotic man is loyal to his country and to the community in which he lives. If he is consistent he will give first preference to Canadian-made goods when making purchases. He will also stand loyally by his local dealer.

Long-headed clergymen preach short sermons.

Play is the work a man does that isn't compulsory.

Oh, Money! Money!

ELEANOR H. PORTER

Printed by Special Arrangement with The Allen, Toronto, Ont.

(Continued)

"Oh, hang it all—yes. Of course you may come. To-morrow at ten if they don't shut you up before." With a boyish laugh Mr. Stanley G. Fulton leaped to his feet.

"Thanks, to-morrow at ten then." At the door he turned back faintly. "And, say, Ned, what'll you bet I don't get fat and young over this thing? (What'll you bet I get so I can eat meat and 'laters again?")

CHAPTER II.

Enter Mr. John Smith.

It was on the first warm evening in early June that Miss Flora Blaisdell crossed the common and walked down the street that led to her brother James's home.

The common marked the centre of Hillerton. Its spacious green lawns and elm-shaded walks were the pride of the town. There was a trellised band-stand for summer concerts, and a tiny pond that accommodated a few boats in summer and a limited number of skaters in winter. Perhaps, most important of all, the common divided the plebeian East Side from the more pretentious West. James Blaisdell lived on the West Side. His wife said that ever since she was anybody. They had lately moved there, and were, indeed, barely settled.

Miss Blaisdell did dressmaking. Her home was a shabby little rented cottage on the East Side. She was a thin-faced little woman with an anxious frown and near-sighted, peering eyes that scrutinized everything she looked for wrinkles. She peered now at the houses as she passed slowly down the street. She had been only twice to her brother's new home, and she was not sure that she would recognize it, in spite of the fact that the street was still alive with the rays of the setting sun. Suddenly again her worried face flashed a relieved smile.

"Well, if you ain't all here out on the piazza!" she exclaimed, turning in at the walk leading up to one of the ornate little houses. "My ain't this grand?"

"Oh, yes, it's grand, all right," nodded the tired-looking man in the big chair, removing his feet from the railing. He was in his shirt-sleeves, and was smoking a pipe. The droop of his thin mustache matched the droop of his thin shoulders—and both definitely but unmistakably spelled disillusion and discouragement. "It's grand, but I think it's too grand—for us. However, daughter, say the best is none too good—in Hillerton. Eh, Bessie?"

Bessie, the pretty, sixteen-year-old daughter of the family, only shrugged her shoulders a little peculiarly. It was Harriet, the tall, thin, and a little larger, florid woman with a short upper lip, and a bewitching of beaming light hair. She was already on her feet, pushing a chair toward her sister-in-law.

"Of course it isn't too grand, Jim, and you know it. But you ain't any really nice houses in Hillerton except the Pennocks' and the old Gaylord place. There, sit here, Flora. You look tired."

"Thanks, I'm—terrible tired. Warm, too, ain't it? But what's the hat had taken off. 'My, it's fur over here, ain't it? Not much like it was when you lived right round the corner from here. And I had to put on a hat and gloves, too. Some-way, I thought I ought to—over here."

Condescendingly the beaming head threw an approving nod in her direction.

"Quite right, Flora. The East Side is different from the West Side, and no mistake. And what will do there won't do here at all, of course."

TOBACCO HEART

Every Smoker Read This

Tobacco does not seem to affect all alike. Many men enjoy their smoke, live to a good old age, and apparently suffer no ill-effects from the use of the weed.

There are others, though, on whose heart and nervous system tobacco produces the most serious results.

It causes palpitation, pain in the heart, and irregularity of its beat makes the hands tremble, sets the nerves on edge, and causes shortness of breath and loss of sleep.

To counteract this demoralizing influence on the heart and nerves there is no remedy so good as Milburn's Heart and Nerve Pills.

They make the heart beat strong and steady, restore tone and vigor to the nerves, and rid the system of the evils caused by the tobacco.

Mr. D. McKillop, Cochrane, N.S., writes:—I was using too much tobacco, and got so I could not sleep at night, my hands used to tremble something awful, and I suffered terrible from pain in my heart. I took a friend about it, and he advised me to get your Milburn's Heart and Nerve Pills. I took two boxes and they gave great satisfaction.

W. N. U. 1376

Entirely New Treatment For Bronchitis, Catarrh No Internal Medicine To Take

Years ago the profession fought Catarrh by internal dosing. This upset the stomach and didn't remove the trouble. The modern treatment consists of breathing the healing soothing essence of Catarrhoxone, which cures instantly to the source and the trouble. Catarrhoxone is successful because it penetrates where liquid medicine can't go. The balsamic vapor of Catarrhoxone drives out the germs, soothes the irritation, relieves the cough, makes Catarrhal troubles disappear quickly. For bad throat, coughs, bronchitis, Catarrhoxone is a wonder. Two months treatment one dollar. Small size 50c. Sold every-where. The Catarrhoxone Co., Montreal.

"How about father's shirt-sleeves?" It was a scornful gibe from Bessie in the hallway. "I don't notice any of the rest of the men around here sitting out like that."

"Bessie!" chided her mother wearily. "You know very well I do not sit out in my shirt-sleeves. I'm sure I've tried hard enough, I'm sure!" "Well, well, Hattie," sighed the man, with a stare of abandonment. "I supposed I still had the rights of a freeborn American citizen in my own house, but I haven't."

Resigningly he got to his feet and went into the house. When he returned a moment later he was wearing his coat.

Benny, perched precariously on the veranda railing, gave a sudden indignant snort. "Benny was right, the youngest of the family."

"Well, I don't think I like it here, anyhow," he chafed. "I'd rather go back to my life where the rent is a lot less. And it would help a lot."

"But Hattie, we could," interposed her husband eagerly. "There's that big front room that we don't use at all. And it would help a lot."

At the wrathful warning in his wife's eyes he fell back silenced.

"I don't see how it can be any other way," reiterated the lady distinctly. "Furthermore, we do need the room ourselves."

"Yes, yes, of course, I understand," broke in Mr. Smith, as if in haste. "I think Mr. Chalmers meant that perhaps one of you—the glanced uncertainly at the anxious-eyed little woman at his left—might—or—accommodate me. Perhaps you may—"

He turned as it fell upon Miss Flora Blaisdell, and waited. The little dresser-maker blushed painfully.

"Me? Oh, mercy no! Why, I live all alone—that is, I mean, I couldn't, you know," she stammered. "I dressmake, and I don't get any sort of meals—not for a man, I mean. Just women's things—trousers and blouses. I'll never be long enough at it to do it."

She came to an expressive pause.

"Oh, I could stand the biscuit, too, as long as they're not health biscuits," laughed Mr. Smith genially. "You see, I've been living on those and hot water quite long enough."

"Oh, ain't your health good, sir?" The little dresser-maker's face wore the dearest concern.

"Well, it's better than it was, thank you. I think I can promise to be a good boarder, all right."

was so kind." Still with that deference so delightfully heart-warming, the newcomer bowed low to the ladies, and made his way to the offered chair. "I will explain at once my business," he said then. "I am a geologist."

"What's that?" It was an eager question from Benny on the veranda railing. "Pa isn't anything, but he's a geologist."

"Hush, child!" protested a dunt of feminine voices sofly; but the stranger, apparently ignoring the interruption, continued speaking.

"I am gathering material for a book on the Blaisdell family," repeated Mr. James Blaisdell, with cordial interest.

"Yes," bowed the other. "It is my purpose to remain some time in your town. I am told there are valuable records here, and an old burying-ground of particular interest in this connection. The neighboring towns, too, have much Blaisdell data."

Understand, a A said I am tending to make this place my headquarters, and I am looking for an attractive boarding-place. Mr. Chalmers was good enough to refer me to you."

"To us—for a boarding-place?" There was an unmistakable frown on Mrs. James D. Blaisdell's countenance as she said the words. "Well, I'm sure I don't see why he should."

"You don't keep boarders?" "But, Hattie, we could," interposed her husband eagerly. "There's that big front room that we don't use at all. And it would help a lot."

At the wrathful warning in his wife's eyes he fell back silenced.

"I don't see how it can be any other way," reiterated the lady distinctly. "Furthermore, we do need the room ourselves."

"Yes, yes, of course, I understand," broke in Mr. Smith, as if in haste. "I think Mr. Chalmers meant that perhaps one of you—the glanced uncertainly at the anxious-eyed little woman at his left—might—or—accommodate me. Perhaps you may—"

He turned as it fell upon Miss Flora Blaisdell, and waited. The little dresser-maker blushed painfully.

"Me? Oh, mercy no! Why, I live all alone—that is, I mean, I couldn't, you know," she stammered. "I dressmake, and I don't get any sort of meals—not for a man, I mean. Just women's things—trousers and blouses. I'll never be long enough at it to do it."

She came to an expressive pause.

"Oh, I could stand the biscuit, too, as long as they're not health biscuits," laughed Mr. Smith genially. "You see, I've been living on those and hot water quite long enough."

"Oh, ain't your health good, sir?" The little dresser-maker's face wore the dearest concern.

"Well, it's better than it was, thank you. I think I can promise to be a good boarder, all right."

(To be continued)

Training Newspaper Men

Management of a Newspaper Requires a Great Deal of Executive Ability.

A School of Journalism depends a great deal on the men at the head. Undoubtedly it is just as important to have leaders of thought in social, political and economical questions as it is to train leaders of religion, medicine and science. The difficulty is to combine the theoretical with the practical. There is a widespread view that anyone can be an editor, and the running a paper is child's work. The fact that 146 newspapers went out of existence in this province the last half-dozen years would indicate that the management of a newspaper requires a great deal of executive ability, careful judgment and foresight. It is not the easy task the public generally imagine. Undoubtedly the establishment of a School of Journalism in some of our large centres would be worth while. Similar schools in the United States have met with a large measure of success.—From the Farmers' Sun.

Canadian Vessels Lost During War. The Canadian merchant vessels captured or destroyed by the enemy had a gross tonnage of 74,323 tons. Most of them were destroyed by torpedo attack from submarines without warning. The lives lost in these sinkings numbered 199. The greatest loss of life in one evening occurred at the sinking of the S.S. Royal Edward of 11,117 tons on August 13, 1915, having been torpedoed by a submarine without warning.

Crop Statistics. The total area estimated to be sown to wheat in Canada for the harvest of 1921 is 18,654,100 acres, according to preliminary estimates issued by the Dominion Bureau of Statistics. Of oats, the total area sown is placed at 13,295,000, a decrease of 4 per cent. from last year. The area sown to barley amounts to 2,456,000 acres, 698,500, and hay and clover 10,545,000 acres.

Drink Water When Tired. Dr. Eliza B. Mosher urged lately the members of the Women's Medical Society of New York to drink a glass of water at 10 a.m. and others at 3, 4 and 5 p.m. This, she told them, would dilute the products of fatigue which were entering the blood and causing that tired feeling.

Shutting Out The Air

BY LORETTO C. LYNCH
An Acknowledged Expert in All Matters Pertaining to Household Management.

On a warm day, in a New England University town, I noticed recently that few houses boasted window or door screens. In the four hundred houses I looked at I found but two screen windows. In six cases the windows were opened, but no screens impeded the access of flies, mosquitoes and gnats. In every other case the windows were tightly shut.

In some cases the windows were beautifully curtained behind the highly polished window glass. In other cases the shutters were half drawn. But the salient fact was that the windows were shut. There were no screens.

And the windows in the back of the houses were shut. I know they were, for I walked round to the back of more than several dozen houses, to the vexation of more than one flea-ridden dog.

The women gave various excuses. One sought to keep the place cool, to keep the heat out; another told me she had several small children and did not propose to let the dust in. One told me she could not afford to buy screens yet. This woman bought the most luxurious food in the town and encouraged her daughters to dress expensively.

All of the women I interviewed, with their children, showed the back of fresh air. They had actually arrived at a state of mind where they valued a rug and a bit of wall paper more highly than Heaven's free ozone. They preferred impure air to the possible presence of a little dust.

Do you, Mr. Housewife, belong to this class? Do you have a screen on every window? And if your rooms are particularly warm, how about getting some awnings?

We can live without food for some time. We cannot live without air for even a short time.

When crab meets crab they side-step.

An Important Item

Sound digestion is the basis of health and vigor. Digestive disorders should have prompt attention. If you suffer from sluggish liver, constipation, impaired appetite, flatulence, dizziness, headache, biliousness, or other symptoms of stomach disorder you may expect to obtain relief by taking

LARGEST SALE OF ANY MEDICINE IN THE WORLD

Plain Misters Rule Empire

Premiers of the Empire at London Conference Are Most Democratic

There are now no prime ministers in the Dominion who are burdened with the prefix "Sir." The last of them was Sir Louie Gouin, Newfoundland, unlike Canada, did not promulgate a "self-denying ordinance" in regard to knighthoods, and so her prime minister, Richard A. Squires, was created this month a K.C.M.G. He is the only prime minister in the Western Hemisphere who is a British knight; while the only one in the Eastern Hemisphere so honored is the premier of Tasmania, Sir Walter H. Lee. The Premier of Great Britain is a plain "Mr." And the premiers of the Empire who meet in conference in London are Messrs. Lloyd George, McKeen Hughes, Smuts and Massey.—Toronto Star.

A Matter of Looks.

A homely young English chap having his view obstructed by the headgear of the girl in front of him, ventured to protest. "See here, miss," he said, leaning over, "I want to look as well as you."

"Oh, do yer?" she replied, in a rich Cockney accent, as she turned and looked him square in the eye, "then you'd better run 'ome and change yer face."—Boston Transcript.

The bulls eye lantern of the London police has been replaced by a neat electric lamp.

Canada As A Seat Of Learning

Opportunity For Study One of the Most Striking Features of Canadian Life.

Canadians have twenty-two universities and forty-three colleges. In addition they have nearly 30,000 elementary schools, with 22,000 teachers, and have an enrolment of nearly 1,500,000 pupils. Lord Burnham, chairman of the Imperial Press Conference, said: "Canada's achievement in its institutions of learning is one of the most striking features of Canadian life."

Soldiers' Re-establishment.

A total of \$161,000,000 was paid in war service gratuities and 47,000 dependents were returned from overseas at the conclusion of the war, according to the report of the Department. Soldiers' Civil Re-establishment. Dealing with employment relief given to returned men and their families, the report states that \$7,058,989 was spent during 1919-20 and \$1,500,000 during the past year.

Making History.

INFANT MORTALITY in past ages has been something frightful, something almost beyond belief, and even today it occupies the time and the mind of leading physicians in all countries. The death rate among infants is being gradually reduced through new methods of hygiene, new preventatives and new remedies for infants. This reduction in the death rate has NOT been accomplished by adapting the precautions taken and remedies used by adults. Rather has it been to keep clear of the old methods, and choose after long research the precautions and remedies specifically applicable to infants.

This being so, is it necessary for us to caution mothers against trying to give her baby relief with a remedy that she would use for herself? Will she remember that Fletcher's Castoria is strictly a remedy for infants and children?

Children Cry For

Fletcher's

CASTORIA

Of Course You Love Your Baby.

You love it because of its very helplessness, because it can't tell you what is the matter when it feels bad. It can only cry and beg for help. But the more you love baby, the more you want to help baby, the more you ought to realize what a wonderful remedy Fletcher's Castoria is. It has been used for babies' ailments for over thirty years.

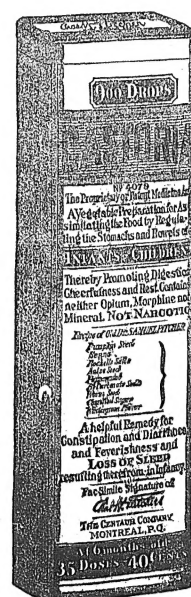

An experienced doctor discovered Fletcher's Castoria especially for babies' use. It is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. Doctors who know what is safe and best for babies have only good to say of it.

Don't neglect your baby. Get a bottle of Fletcher's Castoria and give baby a few doses of it. See how the little one smiles at you as if trying to thank you for helping it. Soon you will learn to depend on Fletcher's Castoria, made just for infants and children, and of course you would not think of using anything for them that was not prepared especially for infants and children. So keep it in the house.

World Happenings Briefly Told

Traffic through the Panama Canal in May was the lightest for any month since June, 1920.

A contract for construction of a 10,000-ton fuel ship for the Japanese navy has been awarded the New York Shipbuilding Corporation.

A request for investigation of census figures showing the Japanese population of California to be 71,942 was forwarded to Washington.

Farmers in Aroostook County, Michigan, dumped 45,000 barrels of potatoes in their fields, where they will be plowed in to serve as fertilizer.

Circulation of dimes, pennies, nickel quarters and half dollars in the U.S. amounts to \$361,319,628, and silver dollars to \$27,584,548.

Fort Norman oil is of such high grade that it did not freeze last winter, even during 58 below zero weather.

Three hundred convicts from prisons in New York State have been divided into "honour gangs" and put to work on road building.

The volume of travel on the Great Lakes this summer is unprecedented according to H. B. Smith, president of the Northern Navigation Company.

The first estimate places the wheat crop of Italy at 180,000,000 bushels, compared with 141,000,000 last year and 169,000,000 in 1919. The crop outlook in Rumania is favorable.

On account of the crime wave at present existing on the island of Montreal and inadequate police protection, burglary insurance companies have advanced their rates from 25 to 100 per cent.

Martin Gorley's communist wife, Mme. Andreva, has succeeded in passing the Soviet frontiers in an effort to escape starvation which is causing many of the Red leaders to flee Moscow for diplomatic jobs elsewhere.

A party of 30 ex-Imperial service men, who were granted free transportation from England, arrived in Winnipeg recently. Practically all of these men are going to work on Manitoba farms for a year before taking up land of their own.

Yuka Osaki, former Prime Minister of Japan, on the conclusion of a 10,000-mile campaign of the empire in behalf of limitation of armaments, declared his conviction that if the United States Government proposed a conference on limitation of armaments it would meet with an eager response throughout Japan.

PAINS SO BAD STAYED IN BED

Young Mrs. Becroft Had Miserable Time Until She Took Lydia E. Pinkham's Vegetable Compound.

Hamilton, Ont. — "I have suffered for three years from a female trouble and consequent weakness, pain and irregularity which kept me in bed four or five days each month. I nearly went crazy with pains in my back, and for about a week at a time I could not do my work. I saw Lydia E. Pinkham's Vegetable Compound advertised in the Hamilton Spectator and I took it. Now I have no pain and am quite regular unless I overwork or stay on my feet from early morning until late at night. I keep house and do all my own work without any trouble. I have recommended the Compound to several friends." — Mrs. EMILY BECROFT, 269 Victoria Ave. N., Hamilton, Ontario.

For forty years women have been telling how Lydia E. Pinkham's Vegetable Compound has restored their health when suffering with female troubles. This accounts for the enormous demand for it from coast to coast. If you are troubled with any ailment peculiar to women why don't you try Lydia E. Pinkham's Vegetable Compound? It is made from native roots and herbs and contains no narcotics or harmful ingredients.

For special advice women are asked to write the Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of forty years experience is at your service.

Biography of Prince of Wales

Many Experiences Related In Book Just Published.

The birthday anniversary of the Prince of Wales was made the occasion for the publication of an "authentic biography"—by a lady. The author is Miss G. Ivy Sanders, and however authentic it may be, the book is full of all sorts of stories about the Prince's experiences such as those which made New York say of him: "Ain't he a nice kid?"

Quoting the Prince himself concerning his New York visit, Miss Sanders writes: "They called me a real mixer. They got tired of calling me 'Sir' and called me 'Prince.' They called me 'Prince' until every time they said it I felt I would have to bark and wag my tail."

Going back to his childhood the book tells how the little Prince rushed from his nursery in White House one day to find an outfit there with a new suit which he wanted very much.

"Come right in," the Princedom called. "There is no one here that matters much, just grandpa."

The book also tells of the coronation procession when the Prince made his younger brother get under the seat so as to make more room in the carriage. Incidents of real personal bravery during the war are given, as well as an account of his trips to the United States and the Dominions.

Wyandottes Lead Layers

In the Lead at the Manitoba Egg Laying Contest at Brandon.

For the past thirteen weeks a pen of White Wyandotte eggs, owned by Mrs. A. S. Hart, of Gladstone, has been in the lead at the Manitoba egg laying contest at Brandon experimental farm. These birds, with a total of 1,260 eggs to their credit, are still leading at the end of the 35th week. The contest is conducted by the Dominion Experimental Farms throughout Canada.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh troubles them much more than when they are in good health. It is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier, and cleanses the blood, purifies the surfaces of the body, thus reducing the influence of the blood on the local conditions. All druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Needed Fattening

Cardinal Manning was extremely emaciated and thin. His emaciation was visiting a convent in Liverpool where an Irishwoman was cook. She was presented to the cardinal, and after receiving his blessing, she looked up at him and said: "May the Lord preserve your emaciation, and, oh, may God forgive your cook!"—Liverpool News.

STOMACH TROUBLE DUE TO THIN BLOOD

It Usually Disappears When the Blood is Made Rich and Red. Thin blood is one of the most common causes of stomach trouble. It affects the digestion very quickly. The glands that furnish the digestive fluids are diminished in their activity, the stomach muscles are weakened and there is a loss of nerve force. In this state of health nothing will more quickly restore the appetite, digestion, and normal nutrition than good, rich, red blood.

Dr. Williams' Pink Pills act directly on the blood, making it rich and red, and this enriched blood strengthens weak nerves, stimulates tired muscles, and awakens to normal activity the glands that supply the digestive fluids. This is shown by an improved appetite, and soon the effect of these blood enriching pills is evident throughout the whole system. You find that what you eat does not distress you, and that you are vigorous instead of irritable and listless. If your appetite is feeble, if you have any of the distressing pains and symptoms of indigestion, you should at once take Dr. Williams' Pink Pills and profit by the better condition which they will put you back in.

These pills are sold by all dealers in medicine, or you can get them by mail at 50 cents a box or six boxes in \$2.50. The Dr. Williams' Medical Co., Brockville, Ont.

A large nest of wasps will account for at least 24,000 flies a day, says one naturalist.

MINARD'S
"KING OF PAIN"
LINIMENT

Blistered Feet, Sore Feet, Tired Feet, Burning and Aching Feet.

After a hard day's work or a long tramp and feet are completely tired up, bath them in a hot water, then rub them well with MINARD'S LINIMENT. You will find that you and your family will never be without a bottle.

Minard's Liniment for Dandruff.

Study Geological Formation in North

To Investigate Oil and Mineral Resources of MacKenzie River District.

The Geological Survey has sent four field parties to investigate further the oil and other mineral resources of the MacKenzie River district. Special attention will be paid to the examination of the succession and fold structure of the Devonian sediments in the Fort Norman district, where oil was obtained last fall by the Imperial Oil Company, and to the systematic mapping and study of the geological formation on each side of the MacKenzie River between Great Slave Lake and Fort Norman.

DO YOU FEEL LIKE THIS WHEN YOU WAKEN?

Do you feel blue sickly, heavy, too tired to get up? If so, it's probably from liver which is slow, and needs to be toned and stimulated by Dr. Hamilton's Pills. It's a wonderful change Dr. Hamilton's Pills will make in a few days. They relieve the system of poisonous wastes, they aid the stomach, improve digestion, increase your appetite. You'll feel like new all over after using this health bringing medicine. Thousands have proved it. Sold everywhere in 25c boxes, or The Catarthozone Co., Montreal.

English Boys for Canadian Farms.

On board the Canadian Pacific Railway steamship Victorian which arrived at Quebec recently was a party of twenty-eight English orphan boys en route to Sherbrooke, where they will be instructed in the rudiments of Canadian farming and after a course of one or two months will be sent out to different farms in the Dominion.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are a safe and effective remedy, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigor. Moreover, so that besides being an effective vermifuge, they are tonic and health-giving in their effects.

Some Newspaper Figures

Comparative Publishing Costs of a Newspaper Since 1907.

An editor who has a morbid taste for post-mortem examinations, has prepared a schedule of the comparative publishing costs of a newspaper since the year 1907. In submitting his figures, he makes the trite remark that while during the war and after, men in general have been busy with their time holidaying in Florida or California, or acquired a taste for high powered motor cars, and the wage earners blossomed forth in silk shirts, the average publisher either went broke, or burnt the midnight oil trying to keep on the right side. In his figures he takes the year 1907 as normal and put every item in that year on a basis of 100. His schedule shows the great increases since then, and incidentally the editorial salaries have advanced less than any other branch of the cost.

In 1907 wages were at 100; in 1914 they had advanced to 178, but in 1921 the figure is 393. Newspaper, from 100, jumped to 177 in 1914, and to 623 in 1921. Newspaper postage, which cost the normal of 100 in 1907, was 147 in 1914, and 347 in 1921. Ink was 100 in 1907, 200 in 1914, and today stands at 331. Editorial expense jumped from 100 in 1907 to 120 in 1914 and 241 in 1921. Miscellaneous expenses went from 100 in 1907 to 125 in 1914, and to 244 in 1921. Taking the average of all newspaper costs, it was found that while the average in 1907 was 100, in 1914 it was 159, and in 1921 it reached the high mark of 411.

From reading these figures it is not surprising to read next that over four thousand publications have gone out of business in the United States and a great many in this country. The reason is not far to seek for advertising rates and subscriptions have not advanced in anything like a corresponding degree. The publishing of the above figures shows how hard the newspapers have been hit by the inflation in prices.

Increased Immigration Immigration to Canada for the month of April, 1921, totalled 13,052 in comparison with 13,287 in April, 1919, an increase of 13 per cent. Of the total newcomers 8,476 were from the British Isles, 5,035 from the United States, and 1,541 from other countries.

Lumber Shipments From Vancouver. Up to the present time this year seventy-two million feet of lumber have been shipped from Vancouver to all points. Of this amount, thirty-eight million was carried in government ships. The total export of lumber in 1920 amounted to only 89,792,000 feet.

Tangerine Chiffon For Evening Party

By Marie Belmont.

Among the decorations that are much in vogue at this time are beads. Sometimes these are extremely large or again they may be quite tiny when they are massed together to achieve a decorative effect. On this evening gown small and large alternate where they are used to outline the dress. It is fashioned very simply. The skirt is designed with an irregularly draped unite that is prettily weighted by the beads. The corsage is made with a deep U-opening. A small piece of the chiffon is inserted in the opening, the upper part being bound with lace, while the girle is enriched with flat silk roses.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

A marine grass found extensively in Japanese waters yields a fibre which, when mixed with cotton, both strengthens and cheapens thread, which is usually made of cotton alone.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to be relieved except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has given relief to a generation of asthmatic victims of this scourge of the bronchial tubes. It is sold everywhere.

Shark Fishing at the Coast. Five hundred mud sharks in less than two hours is the catch announced by the Anglo-British Canadian Company, Limited, which organization is now prosecuting the shark fishing industry in the gulf of Georgia.

More than twenty mahogany-like woods are now offered as such mahogany, not to mention a considerable number of woods cunningly stained to imitate mahogany.

Spend your money at home, thereby helping your own town and local merchants.

PIMPLES ON FACE CUTICURA HEALS

Caused Disfigurement. Itchy and Burning. Had Restless Nights.

"My face came out in little pimples that were sore, and I scratched them constantly, and then they turned into scales, causing much disfigurement. The skin was so itchy that I irritated it by scratching. The burning was fierce, and I had many restless nights."

"This trouble lasted about a year before I used Cuticura Soap and Ointment, and after using three cakes of Soap and two boxes of Ointment I was healed." (Signed) W. E. Evans, St. Basile, Que., Nov. 23, 1918. Make Cuticura Soap, Ointment and Talcum your daily toilet preparations. Soap 25c, Ointment 25c and 50c. Sold everywhere. Write for literature to The Cuticura Medicine Co., Portland, Me., U.S.A.

U.F.A. Candidate Speaks in Chinook

That the interest in politics is still keen, was evident last Saturday night when Mr. Proudfoot, the U.F.A. candidate, and his supporters addressed a gathering of farmers in the Chinook School. Although Mr. Proudfoot had just returned from the country and was not feeling at his best, yet he gave an interesting and instructive address on the U. F. A. platform.

In his opening remarks Mr. Proudfoot said, that it was quite evident, from the majority that Mr. Gardiner received in the recent contest for the Federal seat of Medicine Hat, that the people are opposed to party politics. This fact has been emphasized by the elections in the province of Saskatchewan. Opinion tends in the same direction throughout Alberta. Now it is merely cam-

ouflage, for a Party candidate to represent himself as Independent. The party man must obey his Leaders.

One of the planks in the U. F. A. platform was that 30 days notice be given before the issuing of the writ for any provincial election. The speaker in referring to this said, that under the present system the government fixed the time to suit themselves.

We endorse the principle of the initiative, referendum and recall said Mr. Proudfoot, and until this law was in effect it was impossible to have progressive legislation.

Abolition of the patronage system in the conduct of all provincial business was another plank in their platform. If we offer no other reason, said the speaker, why you should vote for a farmer's candidate, this is enough. For it is by the use of the patronage system that the old parties are kept in line.

Mr. Proudfoot was in favor of a highways commission being

created whose function it should be to supervise and control all provincial road work and expenditures for that purpose, which commission shall supplant the present method of party control and patronage.

Mr. J. P. Watson also gave a talk on group legislation, while Mrs. Fraser spoke on the public health of the province, and said that was a plank in the U. F. A. platform for, adequate provision for the maintenance of the health of the people as the duty of the government. Speaking on rural education, Mrs. Fraser said there was ample room for improvement in this direction, and the farmers' platform was to provide, as far as possible, equal opportunities for all children of all the people by gradually extending and improving educational facilities.

Get ready now for Chinook Fair; prizes differ very little from last year's prize list.

The Service Garage is selling plain casings 30 by 3 1/2 at 16.50 Non-Skids at 19.50 and Nobby Treads at 20.00. Other sizes of tires and tubes at proportionate prices.

CLOVER LEAF NEWS

Call at the Advance Office for Fair Prize List.

There was a large turn out to U.F.A. last Saturday night. The business of the coming election was discussed, and reports from the delegates attending the convention was heard. The next meeting will be held July 30.

Mr. Geo. Thompson is attending camp meetings at Red Deer Messrs. Davis and Duncan, who have been attending the camp meeting, returned last week, and report having a splendid time.

Miss Sui Brown has been spending a week with friends in town.

Mr. and Mrs. Horace Dunster were guests at the Brown and Wilson home on Sunday.

The Dominion Experimental Farms are sending a large exhibit to the Chinook Fair.

The ladies of the Collingwood U.F.A. are to have a meeting in the near future for the purpose of organizing a U.F.W.A.

Clover Leaf School closed June 15, for a vacation.

Miss Isabell Sherrier, of New York, is spending a holiday here. She is a friend of Mr. Harry Strong.

Mr. and Mrs. M. McKinnon and daughter, Mr. and Mrs. Wilson, Mrs. J. C. Hess were guests at the home of Mr. and Mrs. Bossenberry on Thursday evening in honor of their daughters, Mrs. Huston and Mrs. Seaman of Calgary, who are visiting them. Dainty refreshments were served and a delightful evening was spent.

Rev. Mr. Cummings will preach at Clover Leaf next Sunday at 11 a.m. Everybody come.

Misses I. McGivney and Sue Brown are in Youngstown this week attending the Chautauqua.

158 Candidates in the Field

158 candidates are in the field to contest the 61 seats in the province, for the provincial election on Monday, July 18.

Government Candidates	58
Conservative Candidates	12

Labor Candidates	15
Independent Candidates	27
Socialist Candidates	2

Stewart Administration Promises AND Performs

VERY little serious criticism has ever been levelled at the Stewart administration. This is because, in accordance with the eternal principles of Liberalism, it has dealt fairly and justly by the people. It has given uniformly good government of a constructive kind, unhampered by considerations of political expediency, and always with the view of public betterment. It has stood for the square deal for everybody in everything its record has withstood successfully and with flying colors the acutest test of the keenest possible public criticism.

ALBERTA'S UPWARD PROGRESS

No greater tribute to the Alberta government could be paid than that offered by Mrs. H. M. Edwards, of McLeod, president of the provincial council of women, who, in the preface to the first and second editions of her book on "The legal status of women of Alberta," says that "the women of Alberta are more favored in regard to legal status than are those of any other province in Canada." Such tribute might justly be applied to all classes in the province, for the legislative record of Alberta's Liberal governments has been one of constantly upward progress, many of the enactments placed on the statute books having been adopted by other progressive governments of Canada and elsewhere.

FOR RURAL DISTRICTS

Although the needs of urban communities have been well looked after, the legislation enacted for the special benefit of the rural parts of the province is of striking importance. The appropriation this year for roads, bridges, and ferries is over two and one-quarter million dollars, making a total appropriation for that purpose in five years six and one-quarter million dollars. The province has been covered by a network of telephone lines, so that now even the most remote districts are in almost instant touch with populated centres. When unfavorable seasons were experienced in certain portions of the province, the government did not hesitate, but paid out nearly one and one-quarter million dollars for seed grain, feed, and other relief. The

THE STEWART GOVERNMENT today stands behind an imposing record of legislation, created during the last fifteen years, that has truly met the needs of all classes of people in the province. The opening up of the great north country; the provincial guarantee of irrigation lands; the guarantee of the bonds of drainage districts; the strong, systematic and successful effort to obtain wider markets for Alberta coal; legislation along practical lines directly affecting labour, including the workmen's compensation act; the gigantic strikes in health legislation—all these stand as monuments to the progressive policy of the government, and prove that, as the result of the Liberal regime in this province.

Alberta Has the Most Beneficent and Far-Reaching Legislation of any Province in Canada

Province Of Alberta Co-operative Credit Societies

The Provincial Government has provided legislation designed to encourage the co-operation of farmers by adequate credit, longer term loans, lower interest rates, cash prices for purchases, saving of time and labour, and an improved community spirit.

Increased Farm Credit depends upon:

- (1) Greater reliability of loans.
- (2) Certainty of repayment.
- (3) Adequate powers of security.

The Alberta Co-operative Credit Act, in its amended form, grants exceptional powers in the matter of taking necessary security, and repayment can be safely provided for.

Organization of a Society requires:—
1. Fifteen signatures to petition to incorporate.

If You Are Interested and Desire Fuller Information Communicate With—

Hon. C. R. MITCHELL,
Provincial Treasurer,

W. M. SELLER,
